DETAILED ACTION

Allowable Subject Matter

Claims 1-3, 6-8, and 25-28 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art fails to teach simultaneously flowing the barium, strontium, and titanium precursors and oxidizer while changing the flow rate of the oxidizer in order to produce a non-homogeneous ratio of barium relative to strontium within the deposited barium strontium titanate layer. The double patenting rejections of the previous Office Action have been withdrawn in view of the terminal disclaimer filed on May 27, 2004.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
